Professional Summary

AI/ML undergraduate specializing in Generative AI engineering — building LLM-powered agents, RAG pipelines, and multi-agent workflows with LangChain, LangGraph, and LangSmith. Experienced integrating LLM APIs (Groq, Google Gemini), designing tool-calling agents, and shipping deployed Python applications end-to-end. Seeking an AI/ML or Software Engineering internship to build production-grade, intelligent systems.

Education

Bachelor of Technology (B.Tech), Computer Science Engineering — AI & Machine Learning, *Bennett University*
— 3rd Year

Class XII / Class X, *Neiil World School*

- Class XII: 80%
- Class X: 90.6%

Technical Skills

Languages

Python, C++, SQL

APIs

Groq API, Google Gemini API

Developer Tools

Git, GitHub, VS Code

Generative AI / LLMs

LangChain, LangGraph, RAG, Prompt Engineering, AI Agents, Tool Calling, Vector Databases, ChromaDB, Hugging Face, Sentence Transformers

Frameworks & Libraries

LangChain, LangGraph, LangSmith, ChromaDB

Projects

AI Voice Agent, *Sqlite · Vapi Ai · FastApi · Streamlit*

- Architected a real-time conversational voice agent using LangGraph state machines to manage multi-turn dialogue flow and context across turns.
- Integrated Groq-hosted LLMs for low-latency inference and deployed a responsive Streamlit interface for live voice interaction.

GitHub: [om0710/AI-Voice-Agent](https://github.com/om0710/AI-Voice-Agent)

Recruitment AI Workflow, *LangGraph · LangChain · Groq · Streamlit*

- Built a multi-agent recruitment automation pipeline in LangGraph, coordinating specialized agents to parse and evaluate candidate information.
- Streamlined candidate screening by automating repetitive recruitment tasks, cutting manual review effort across the pipeline.

GitHub: [om0710/recrutiment-workflow-](https://github.com/om0710/recrutiment-workflow-)

LangGraph RAG Chatbot with Tool Calling, *LangGraph · LangChain · ChromaDB · Groq*

- Designed an agentic chatbot combining Retrieval-Augmented Generation with dynamic tool-calling, enabling the agent to reason over documents and invoke external tools mid-conversation.
- Orchestrated LangGraph nodes to route queries between retrieval and tool-execution paths, improving response accuracy on multi-step questions.

GitHub: [om0710/langgraph---chatbot-](https://github.com/om0710/langgraph---chatbot-)

RAG Chatbot for PDF Q&A, *LangChain · Google Gemini API · ChromaDB · Streamlit*

- Developed a Retrieval-Augmented Generation chatbot that answers questions from uploaded PDFs using semantic search over vector embeddings.
- Implemented document chunking and embedding storage in ChromaDB, integrated with the Google Gemini API for accurate, context-grounded responses.

Leadership & Extracurricular

Head of Design, BC3 Club, Bennett University — led visual design and creative direction for club initiatives.

Head of Design, IBF Club, Bennett University — directed design output for events and communications.

Multimedia Team Member, Mobilon Club, Bennett University — contributed to multimedia content production.

Achievements

- Built and deployed multiple end-to-end Generative AI applications using LangChain and LangGraph.
- Deployed live AI applications to Streamlit Cloud with fully functioning production interfaces.
- Proficient in Git/GitHub-based version control and deployment workflows.
